

Multi-Level Documentation

DOCUFY knows the added value of
technical documentation.

"Multi-Level Documentation
is our answer to the
challenges of tomorrow."

Get your system ready for the documentation
processes of the future today!

Uwe Reißenweber,
General Manager, DOCUFY GmbH

The DOCUFY Multi-Level Documentation Strategy

We believe that the future belongs to market players who connect their company-relevant content at multiple levels in Information Spaces.

The intelligent organization of information is taking on a pivotal role in an era in which printed paper is making way for digital media and conventional documents are evolving into series of topics.

DOCUFY's software solutions enable you to seize the potential of your documentation at every level. We shape documentation and publication processes in such a way that every information unit makes an optimum contribution to your company's success in every context.

That's what we call Multi-Level Documentation.

<opportunity>

Businesses only make use of 20% of the potential that documentation holds in store.

</opportunity>

Component Content Management Systems (CCMS) organize complex technical documentation processes and support you in complying with legal requirements. DOCUFY invites you to seize even more of the value potential that your content offers. With our Multi-Level Documentation strategy, we have created a range of products that enable every division, unit and department of a company to leverage the content of the technical documentation.

Current level:

- Legal requirements
- Technical documentation, such as operating instructions, service manuals and handbooks

Technical documentation upgrade to the next level of added value:

- Customer service
Order- and product-specific service information
- Marketing
Brochures, product literature, POS materials
- Development
Connecting technical documentation with planning and specification systems during development

Welcome to the Information Space!

Our products define an Information Space that allows you to address individual information units and their variants just the way you need it. This makes it possible to automatically generate product-specific information on a case-by-case basis and publish it in various media.

KEY TECHNOLOGY
for accessing and using the
Information Space

**BASIC
TECHNOLOGY**
for providing
information at various
levels

TopicPilot penetrates the
Information Space and makes it possible to use
your valuable content in a targeted manner.

**DOCUFY®
TOPIC PILOT®**

Think future, publish mobile

**DOCUFY®
COSIMA ENTERPRISE**

For high performance flexibility

**DOCUFY®
COSIMA GO!**

Ready to use, ready to go

**DOCUFY®
MACHINE SAFETY**

Risk assessment, fast and easy

Product Overview

Ready-to-use, mobile publication solution. Company-wide information is accessible and available for specific devices wherever it is needed, online or offline.

Individually configurable information model for optimum integration in current and future documentation processes.

Industry solution for easy, fast, and compliant technical documentation that you can use today - and expand anytime.

Compliant generation of risk assessments for CE marking. DOCUFY Machine Safety supports efficient compliance with the EC Machinery Directive.

**OUR PHILOSOPHY, ALONG
WITH EVERYTHING WE DO,
IS GUIDED BY THREE MAIN
PRINCIPLES:**

COMPLY

Our software solutions always organize documentation processes in such a way that they fulfill legal requirements and industry standards.

SIMPLIFY

Our innovations always aim to simplify and speed up our clients' processes.

MULTIPLY

We leverage a wider range of relevant content in terms of its potential value and benefits better than others.
